EDUCATION

CSU San Marcos **2024 - 2026**

B.S. in Computer Science

Cabrillo College **2021 - 2024**

Associates in Computer Science

RELEVANT COURSEWORK

Data Structures and Algorithms

Operating Systems

Database Systems

Computer Security

Assembly Language and Digital Circuits

Computer Architecture

Intro to Networking

Programming Languages

Intro to AI

Game Programming

Mobile Programming

TECHNICAL SKILLS

Languages:

C++, C#, Python, Java, Kotlin, SQL

Tools:

GitHub, Unity, Docker, Firebase, MySQL, ROS2, Linux

Concepts:

Object-Oriented Programming, Data Structures & Algorithms, Computer Vision, Database Design

PROJECTS

Autonomous Soccer Robot | Python, Docker, ROS2, YOLO, Computer Vision

- Developing real-time computer vision system enabling a robot to autonomously detect and pursue a soccer ball
- Collected and labeled training dataset and trained a YOLO object detection model from scratch
- Containerized ROS2 nodes using Docker to manage and deploy the robot's software systems

Trek — Fitness Tracking Android App | Kotlin, Firebase, Docker, Git

- Designed and implemented Firestore database schema for storing user profiles, run history, steps, and calories
- Built user authentication system and secure cloud data storage using Firebase Auth
- Migrated backend infrastructure from Docker to Firebase to improve scalability

Hollowed Feather — Souls-like Action RPG | C#, Unity, Git

- Developing a bird-themed action RPG inspired by the Dark Souls series
- Implemented core gameplay systems including combat, health, leveling, enemy AI, and player respawn
- Engineered the gameplay loop connecting all systems for a cohesive player experience

WORK EXPERIENCE

Game Test Analyst

August 2026 - Current

Yoh | Contracted to Playstation

- Test an unreleased PlayStation title through structured test cases and exploratory gameplay to identify gameplay, functionality, UI, and technical defects.
- Investigate issues, reproduce bugs, and create detailed defect reports with clear reproduction steps, expected and actual behavior, severity, and supporting evidence.
- Collaborate with QA and game development teams to communicate defects and validate fixes throughout development.
- Analyze game systems and player-facing functionality to identify edge cases, inconsistencies, and potential issues affecting the player experience.

STEM Facilitator

December 2025 - March 2026

Treobytes

- Facilitated hour-long STEM lessons to elementary students covering physics concepts including buoyancy, forces, and gravity
- Guided students through a culminating research project, resulting in individual trifold presentations demonstrating learned concepts
- Organized and officiated a competitive boat navigation competition, managing scoring and event logistics

Photo Sales Associate / Shift Lead

March 2025 - July 2026

Photogenic Inc.-San Diego Safari Park

- Utilize customer service and interpersonal skills to engage with zoo visitors, present photos, and promote purchase options effectively.
- Greet and photograph over 300 customers daily.
- Set up and manage portable photo kiosks and displays to showcase photographs to guests.
